

DESHEYE

MERN

PERSONAL PROFILE

From the vibrant and dynamic tech scene in Lagos, Nigeria, I specialize in building and deploying high-impact digital solutions as a Full-Stack MERN developer.

I thrive on bringing ideas to life, from crafting intuitive, responsive user interfaces with React to architecting robust, scalable APIs with Node.js and Express. With a strong command of MongoDB for flexible data management, I am driven by a passion for creating seamless user experiences and solving complex problems with clean, efficient code.

CAREER EXPERTISE

- MERN Stack: Proficient in MongoDB, Express.js, React, and Node.js.
- Backend & Serverless: Skilled in Go and Supabase for building scalable backend solutions.
- UI/UX & Animation: Expert in Tailwind CSS, Bootstrap, and Framer Motion for dynamic interfaces.
- DevOps: Experienced with Git for version control and collaborative workflows.
- Project Leadership: A fast learner and collaborative team player, adept at translating goals into technical plans.

PROFESSIONAL HISTORY

Project Lead

JollyBargain

- Spearheaded the technical architecture
- Led the development and implementation of core e-commerce functionalities, including dynamic product listings, a user-centric shopping cart, and a streamlined checkout process.
- Managed the project lifecycle

FrontEnd Dev

onFolio SaaS

- Translated high-fidelity mock-ups and wireframes into a fully functional Next.js application, ensuring pixel-perfect design and intuitive user experience for creative professionals
- Architected and developed a modular component library for the SaaS template, significantly streamlining the creation of reusable UI elements and accelerating development cycles.
- Collaborated with project management to define sprint goals and deliver key features on time, effectively communicating technical progress and addressing potential blockers

Fullstack Dev

The Almaarroof Initiative

- Translated government-approved designs into a functional Next.js application, prioritizing a seamless and accessible user experience for all citizens.
- Developed and integrated the Paystack payment gateway, enabling secure and reliable online transactions for public services.
- Architected a modular component system to ensure brand consistency and streamline the deployment of new features across the government's digital platform.

ACADEMIC BACKGROUND

Alx Software Engineering School

Certificate Of Completion, 2022-2024

- Completed a rigorous, project-based curriculum covering foundational concepts in C programming, algorithms and data structures, and system engineering.
- Developed a portfolio of full-stack projects, demonstrating proficiency in both front-end and back-end development as well as modern version control workflows.
- Collaborated extensively in a peer-to-peer learning environment, gaining practical experience in code review, collaborative problem-solving, and professional communication.
